

Tristel

NEWS RELEASE

Tristel extends availability of Dentel infection control range

15 June 2009; Newmarket, UK: The new Dentel range from Tristel is proving to be just the solution for safe, easy decontamination and infection control in dental practice. As well as being available direct from Tristel, the complete product range – which includes Dentel 5, Dentel 100 and Dentel Duo - can now be purchased through the Dental Buying Group (DBG) at www.thedbg.co.uk.

All Dentel products use Tristel's unique patented chlorine dioxide chemistry and are effective against spores, biofilms and other micro-organisms. The complete range is safe, easy to use and meets new Department of Health infection control guidelines HTM 01-05.

Tristel's Dentel portfolio provides environmentally friendly, rapid-response infection control for dental practices and includes applications for dental unit water lines (Dentel 5), dental equipment (Dentel 100), and dental surgery surfaces such as chairs, instrument tables and light switches (Dental Duo).

About Tristel

Tristel uses proprietary chlorine dioxide chemistry to create instrument and surface disinfectants. With its origins as a healthcare business specialising in infection control products, Tristel has recently extended its operations to include legionella control in water supplies and contamination control in the food and pharmaceutical industries.

The company is creating applications for its chemistry that address the four routes of transmission of infection and contamination – surfaces, instruments, water and people.

Tristel plc has its headquarters in Newmarket, UK and a network of distributors around the world. The company was admitted to trading on AIM on 1 June 2005. Its stock exchange symbol is TSTL.
