

## NEWS RELEASE

### Tristel shows latest products for tackling C-DIFF

*Infection Prevention 2008 (22-24 Sep 2008; Harrogate, UK)*

**19 June 2008: Newmarket, UK:** Tristel Solutions will exhibit from its growing range of infection control products at Infection Prevention 2008 (22-24 Sep 2008; Harrogate, UK). Based on proprietary chlorine dioxide technology, Tristel's range now includes products designed and packaged to meet the specific needs of different fields of infection control.

Launched only last year, Tristel **FUSE for Surfaces** is rapidly replacing chlorine tablets as the disinfectant of choice in many areas. Packaged in convenient, easy to use, 'burstable sachets' containing base and activator solutions, **FUSE for Surfaces** delivers high-level disinfection of floors, walls and general hard surfaces in hospitals. It is effective against a wide range of organisms including *Clostridium difficile* and is ready to use with just a single dilution.

In a novel application, co-operation between Tristel and a number of NHS Trusts has resulted in the development of daily cleaning protocols for commodes using the company's **Duo for Surfaces** foam in conjunction with a cleaning wipe. **Duo for Surfaces** is rapidly effective against a wide range of organisms, including *Clostridium difficile* and is safe to use. Together with the wipe, it provides cleaning and sporicidal disinfection in a single step.

For details of the full product range visit Tristel's new website [www.tristel.com](http://www.tristel.com)

### **About Tristel**

Tristel uses proprietary chlorine dioxide chemistry to create instrument and surface disinfectants. With its origins as a healthcare business specialising in infection control products, Tristel has recently extended its operations to include legionella control in water supplies and contamination control in the food and pharmaceutical industries.

The company is creating applications for its chemistry that address the four routes of transmission of infection and contamination – surfaces, instruments, water and people.

Tristel plc has its headquarters in Newmarket, UK and a network of distributors around the world. The company was admitted to trading on AIM on 1 June 2005. Its stock exchange symbol is TSTL.
