

NEWS RELEASE

Tristel shows options for instrument decontamination

22 October 2008: Newmarket, UK: Tristel will exhibit from its extensive range of high level disinfection products at the Institute of Decontamination Sciences (IDSc) Annual Conference and Exhibition from 23-26 November 2008 in Blackpool, UK.

Based on proprietary chlorine dioxide technology, Tristel's products are delivered in a variety of convenient formats designed to suit the specific requirements of the job at hand. Specially tailored packages and products meet the individual decontamination needs that arise in endoscopy; ear, nose and throat; ultrasound; reproductive health and dentistry. Others help tackle the challenges of disinfecting hospital and laboratory surfaces.

For example, Tristel is now the most widely used high-level disinfectant / sterilant for flexible endoscopes in the UK. The company also offers revolutionary decontamination systems for endoscopy with the Tristel Shine benchtop washer disinfectant, the portable Stella 5 unit and the Tristel Generator for continuous delivery of chlorine dioxide solution.

About Tristel

Tristel uses proprietary chlorine dioxide chemistry to create instrument and surface disinfectants. With its origins as a healthcare business specialising in infection control products, Tristel has recently extended its operations to include legionella control in water supplies and contamination control in the food and pharmaceutical industries.

The company is creating applications for its chemistry that address the four routes of transmission of infection and contamination – surfaces, instruments, water and people.

Tristel plc has its headquarters in Newmarket, UK and a network of distributors around the world. The company was admitted to trading on AIM on 1 June 2005. Its stock exchange symbol is TSTL.
