NEWS RELEASE

Ultrasound decontamination on show at UKRC 2008

28 April 2008; Newmarket, UK: Infection control company Tristel will exhibit its **Tristel for Ultrasound** decontamination range at UKRC 2008, a three-day multidisciplinary congress covering all aspects of diagnostic imaging and oncology (2-4 June 2008; Birmingham UK).

Tristel for Ultrasound comprises a number of different products – wipes, foams and solutions – the combination of which is configured according to the specific decontamination task. The system is designed specifically for the decontamination of both non-invasive and invasive ultrasound equipment.

Employing the company's proprietary chlorine dioxide chemistry, **Duo for Ultrasound** and **Solo for Ultrasound** can be used for cleaning and disinfection of all equipment, including skin surface transducers, probe holders, keyboards, monitor cases, control panels, cables and all ultrasound accessories.

The **Tristel Trio Wipes System** provides a controlled manual process for the disinfection of transoesophageal echo (TOE) probes, with full traceability.

For further information about these and other products in the Tristel range please visit www.tristel.com

About Tristel

Tristel uses proprietary chlorine dioxide chemistry to create instrument and surface disinfectants. With its origins as a healthcare business specialising in infection control products, Tristel has recently extended its operations to include legionella control in water supplies and contamination control in the food and pharmaceutical industries.

The company is creating applications for its chemistry that address the four routes of transmission of infection and contamination – surfaces, instruments, water and people.

Tristel plc has its headquarters in Newmarket, UK and a network of distributors around the world. The company was admitted to trading on AIM on 1 June 2005. Its stock exchange symbol is TSTL.
