**NEWS RELEASE  
30 August 2007**

**Tristel shows specialist new products for infection control  
at Medica 2007**

Tristel Solutions has significantly extended its infection control range. Most notably this includes the development of products for specialist areas. These are designed to provide healthcare professionals with effective tools for decontamination and disinfection, and will be on display at Medica 2007 in Düsseldorf, Germany from 14-17 November 2007.

Based on proprietary chlorine dioxide technology, Tristel's range now includes products designed and packaged to meet the specific needs of different fields of infection control. The portfolio encompasses Tristel for ENT, Tristel for Ultrasound, Tristel for Laboratories, Tristel for Surfaces and Tristel for Endoscopy.

Tristel for ENT comprises the TRIO Wipes system designed for use with flexible, non-lumened nasendoscopes. For ultrasound, a combination of wipes, foams and solutions can be configured to suit each specific decontamination task. Conveniently packaged foams and easily activated solutions are the mainstay of Tristel for Surfaces, while solutions, foams and wipes provide effective decontamination in laboratories. A comprehensive range of solutions and accessories addresses endoscopy reprocessing requirements.

The Tristel team will be available throughout the show to advise on your specific decontamination requirements. [www.tristel.com](http://www.tristel.com)

### About Tristel

Tristel uses proprietary chlorine dioxide chemistry to create instrument and surface disinfectants. With its origins as a healthcare business specialising in infection control products, Tristel has recently extended its operations to include legionella control in water supplies and contamination control in the food and pharmaceutical industries.

The company is creating applications for its chemistry that address the four routes of transmission of infection and contamination – surfaces, instruments, water and people.

Tristel plc has its headquarters in Newmarket, UK and a network of distributors around the world. The company was admitted to trading on AIM on 1 June 2005. Its stock exchange symbol is TSTL.
