

Dear Customer,

CLP is the new harmonisation of Classification, Labelling and Packaging. It implements the UN's Globally Harmonized System of classification and labelling of chemicals (GHS) in the EU and replaces previous regulation on chemicals such as DSD and CHIP.

In order to comply with this regulation, which becomes mandatory for mixtures in June 2015, Tristel Solutions Ltd. is updating all relevant Material Safety Data Sheets (MSDS), labels and packaging accordingly. All MSDSs are calculated through a market leading software programme that ensures that all regulations are strictly adhered to.

Please be assured that the formulation and quality of our products remain the same; their performance is not affected.

If you have any questions, please contact your local sales representative or Tristel directly.

Kind regards,
